Natural Family Planning Awareness Week July 24 - 30

NATURAL FAMILY PLANNING

LOVE MERCY LIFE

Opening the Heart of Marriage

What do love, mercy, and life have to do with Natural Family Planning (NFP)?

Everything! That's because the practice of NFP can help a couple open the heart of their marriage to all the gifts that God wishes to provide. Why? Because these authentic methods of family planning respect God's design for married love!

Opening the Heart of Marriage

The Church teaches that in marriage, "Christian spouses have a special sacrament by which they are fortified and receive a kind of consecration in the duties and dignity of their state" (GS, no. 48). Through the practice of the methods of Natural Family Planning, married couples can integrate God's design for life and love in their daily lives.

At times it won't be easy, since sacrifice and honest communication will have to happen. If couples persevere, the benefits are well worth the effort! Husband and wife will see their love grow and deepen. Their hearts, and the heart of their marriage, will be open to all good gifts that the Lord God wishes to give them!

Natural Family Planning (NFP) is an umbrella term for certain methods used to achieve and avoid pregnancies. These methods are based on observation of the naturally occurring signs and symptoms of the fertile and infertile phases of a woman's menstrual cycle. Natural Family Planning (NFP) methods "reflect the dignity of the human person within the context of marriage and family life, and promotes openness to life and the gift of the child. By complementing the love-giving and life-giving nature of marriage, NFP can enrich the bond between husband and wife." (See: Standards for Diocesan NFP Ministry, NFP Program, U.S. Conference of Catholic Bishops, 2010)

NFP is not "Rhythm." The Rhythm (or *Calendar*) method was developed in the 1930s. It was based on the scientific theory that ovulation could be predicted by calculating previous menstrual cycles. This method was often inaccurate because it did not take account of the unique nature of a woman's menstrual cycle. Today's methods of NFP do take account of such variations. Based on observable signs and symptoms of the fertile and infertile phases of the menstrual cycle, NFP methods track the changes associated with ovulation and not only treat each woman as unique, but each cycle as well. The accuracy of women's observations has been validated by scientific research.*
